📄 CAREER OBJECTIVE

I am seeking a position as a Frontend Developer where I can apply my skills in ReactJS, HTML, CSS, and JavaScript to build responsive and user-friendly web interfaces.

🌐 LANGUAGES

- English: TOEIC 815

🎓 EDUCATION

Information Systems

Can Tho University

08/2021 – 12/2025 | Can Tho

GPA: 3.78/4.0

🧩 SKILLS

- Programming Languages: Java, JavaScript, HTML, CSS
- Frontend: ReactJS, Redux Toolkit, Tailwind CSS
- Backend: Spring Boot, Spring MVC, RESTful API
- Database: MySQL, SQL Server, PostgreSQL
- Tools: Git, GitHub, Postman, VS Code, Figma

📁 PROFESSIONAL EXPERIENCE

TekNix Corporation – Can Tho Branch

Full-stack Developer Intern

08/2025 – 11/2025 | Can Tho

Project: Internal Secret Management Platform (Fork of Infisical OSS)

Link: tekvault.teknix.services 🔗

Tech Stack: Fastify, ReactJS, PostgreSQL, Docker, Git

- Implemented **Referenced Secret Key Creation**, automatically generating referenced keys when values match secrets in other services (folders).
- Supported **edit, delete, and update propagation**, ensuring referenced values auto-sync across all linked secrets.
- Added **user permission control (RBAC)** to restrict access and operations on referenced secrets.

📁 PROJECTS

Taxi Booking Management System

10/2024 – 12/2024

Tech: Spring Boot, Spring Security, WebSocket, ReactJS, MySQL, Mapbox

Role: Frontend Developer | *Team size:* 4

- Developed a web-based ride-hailing platform for managing drivers, vehicles, customers, and trips.
- Implemented **real-time ride tracking** and **vehicle movement simulation** on Mapbox using WebSocket.
- Built role-based interfaces for Admin (monitor trips, drivers), Driver (accept/complete rides), and Customer (request rides, rate drivers).
- Integrated fare calculation and loyalty point features.

E-commerce Website

06/2025 – 08/2025

Tech: Spring Boot, Spring Security, ReactJS, MySQL, Redux Toolkit

Role: Fullstack Developer | *Team size:* 1

Github: <https://github.com/tranverse/ecommerce-website.git> 🔗

- Online shopping platform with **product catalog, shopping cart, and order placement**.
- Developed **admin dashboard** to manage products, categories, orders, customers, and employees.
- Implemented **backend APIs** with Spring Boot for cart, order, and user management.
- Built role-based interfaces for Admin (system management) and Customer (browse, add to cart, checkout).
